### **Annation:**

This article outlines the great importance given to foreign languages in the Republic of Uzbekistan and the innovative technologies needed to study them

**Keywords:** Foreign language, game, innovative technology, technological tools, methods, methods

### **Summary:**

This article highlights the great importance given to foreign languages in the Republic of Uzbekistan and the innovative technologies necessary for learning them.

**Key words:** Foreign language, game, innovative technology, technological tools, methods.

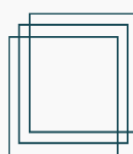

After the independence of our country, interest in teaching foreign languages increased and many opportunities were created for young people. As our first president, Islam Trump, put it, "At the moment, there is a great emphasis on teaching foreign languages in our country. Nor is it inconvenient. Today, there is no need to evaluate the importance of perfect knowledge of foreign languages for our countries, our countries, our foreign partners, and our people who are building their great future in cooperation." As a logical continuation of these ideas, President Q arori expanded the possibility of learning foreign languages "on measures to further improve the Foreign Languages Teaching System," adopted on December 10, 2012. New methods and requirements have been developed in accordance with the Recommendations of the European Framework (CEFR) for the teaching of a foreign language in our country and the evaluation of the knowledge and skills of foreign language teachers. According to him, textbooks were created for students of secondary schools and vocational colleges. In accordance with these requirements, the classrooms were equipped with stands and new information communication technologies. The demand for foreign language learning is also increasing day by day. Foreign language science is divided into four aspects (reading, writing, listening, understanding and speaking), each of which provides special concepts and skills. Educational technologies are the best use of modern advanced automated technologies in this educational process. It also involves improving the quality and effectiveness of education by introducing modern innovative technologies into the learning process.

In particular, there are several advantages to the use of ten technologies for such information and communication in learning a foreign language. The role of modern technology in language learning and teaching is insignificant. The use of technological tools can be used in every aspect of learning a foreign language (reading, writing, listening, understanding, and soon). For example, for listening and understanding, this process is certainly not possible without computers, players, AND CD discs. Listening and understanding is one of the most important parts of language learning. At one point, the reader is required to pay attention to the speaker's pronunciation, compliance with grammatical rules, vocabulary, and its meanings. (Matthew 24:14; 28:19, 20) Jehovah's Witnesses would be pleased to discuss these answers with you. Teaching and learning a foreign language using modern technologies is one of the most expedient methods. In this process, including: - When using computers, the reader can also hear foreign-language video roles, moisturehs, dialogues, movies or movies; - You can hear and watch foreign-language radio broadcasts and television programs; - use magnetic field and cassettes, which are considered a much more traditional method work; - CD players can be used. The use of these technical tools will make the process of learning a foreign language more heated and more efficient [1]. Today, it is becoming a tradition for schools to learn through interactive games. It is well-known that the course is based on a variety of games, ensuring that students are able to demonstrate their abilities, concentrate, improve their knowledge and skills, and be strong. The basis for the use of gaming technology is the activity that activates and accelerates the reader. Psychologists say that the psychological mechanisms of playful activity rely on the fundamental needs of an individual to manifest himself, find a stable place in life, self-government, and accomplish his or her abilities. At the time of any game, the generally accepted teaching principles, tactics must lie. Curriculum should be based on curriculums. In the course of the games, the student is more interested in this exercise than in the ordinary lesson and works freely. It should be noted that the game is the most avant-garde, a way to teach. Students are interested in playful lessons, eager to win, and the teacher also teaches the student. The reader believes that as I play an English game and speak, listen and understand, I can write, he is interested [2]. We know that in the current educational process, the student must be the subject. At the same time, focusing on more interactive methods will improve the effectiveness of teaching. One of the most important requirements for English lessons is to teach students to think independently. English teachers today are the United States States, Based on the experience of English pedagogs, they use the following innovative methods: - Creative Problem Solving (Creative Problem Solving) explains how the story will end to use this method; - "Merry Riddles" (Merry Riddles) is important in teaching English to teach students riddles, they learn words that are unfamiliar to them and find the answer to the riddle; - "Quick Answer" (Quick answers) will help improve the effectiveness of the lesson; - Use all kinds of games in the classroom to interest students in the classroom [3]; -

"Pantomime" (pantomime) this method can be used in a classroom or in writing exercises that should explain very difficult topics and when students are tired; - The "Chain of Stories" (a chain story) method helps students cultivate their oral discourse; - "Role Games" (Acting characters) this method can be used in all types of lessons. To teach craftsmanship, professionals such as "Interpreter," "Translator," "Writer," and "Poet" can participate in the lesson and talk to the students; - Poets and writers such as U.S. Shakespeare, A. Nebuchadnezzar, and R. Burns can be "invited." Using the words of wisdom they have spoken in the classroom at this time will help young people to be raised perfect people; - The "When pictures speak" method is much more convenient, helping students, students develop their oral discourse, so you need to use pictures related to the topic; - Quiz cards (quiz cards) are distributed depending on the number of students, and all students allow them to participate in the classroom at the same time, which saves time [4]. As we have seen, every innovative technology has its own advantages. All such methods involve cooperation between the teacher and the student, the active movement of the student in the teaching process [5]. In a nutshell, the use of innovative methods in English will result in the development of students' ability to think logically, improve their speech, and develop the ability to respond quickly and accurately. Such methods stimulate a student's appetite for knowledge. The reader strives to prepare carefully for the lessons. This makes students active subjects of the teaching process. As the education system makes it a task to educate a free-thinking, perfect, mature person, in the future, we can contribute to the development of future teachers more perfectly ways to make the most of innovative technologies.
