### **Abstract**

This article analyzes the approaches to the upbringing of the perfect generation in the social life of our society at a new stage of development, as well as the issues of the role of the idea of interethnic harmony in this process. Approaches from various sources were analyzed by the author and final conclusions were drawn.

**Keywords:** harmonious personality, culture, upbringing, heredity, development, perfect personality.

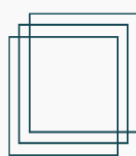

As we all know, the decree of the president of the Republic of Uzbekistan dated February 7, 2017 PF-4947 "on the" strategy for further development of the Republic of Uzbekistan " was adopted. The decree describes the strategy of action on the five priority sides of the development of the Republic of Uzbekistan in 2017-2021, the purpose of which is to radically increase the effectiveness of reforms carried out in our country, create conditions for ensuring the comprehensive and rapid development of the state and society, modernize the country and liberalize all spheres of life.

For the formation of a person as a harmonious person, such factors as heredity (as a human-biological being), the social environment (socio – economic life), as well as purposefully organized upbringing and its activities are influenced, and many more. Therefore, in the process of pedagogical education, the development of students and young people as individuals, the laws of its comprehensive maturation, factors affecting personality maturity are studied. The main goal of higher pedagogical education is also to comprehensively realize the creative capabilities of the individual, taking into account his mental, spiritual, moral, aesthetic, physical development, the age and personal characteristics of students, the formation of humanitarian relations.

On January 19, 2021, under the chairmanship of the president of the Republic of Uzbekistan Shavkat Mirziyoyev, at a videoselector meeting on the issues of radical improvement of the system of spiritual and educational affairs, strengthening the cooperation of state and public organizations in this regard: "if the body of the life of society is the economy, its soul and spirit are spirituality. As long as we have decided to build a new Uzbekistan, we will rely on two solid pillars. The first is a strong

Learning is a scholarly peer reviewed international Journal**

economy based on market principles. The second is a strong spirituality based on the rich heritage of our ancestors and national values”.

If the maturation of an individual is lagging behind the development of society according to the law of upbringing, conditions have not been created for the implementation of a social goal

in the case, it is difficult to implement it. the teacher, researching the problem of the development of a whole, holistic personality in the training of personnel, interprets personality as a subject of social relations and conscious activity. Also, the integrity of the individual is determined in the context of environmental awareness as well as the social environment. The teacher's self-awareness and activity as a person, striving for a goal, promotes the idea that the student adapts to the socio-pedagogical environment and contributes to self-assessment.

The study develops pedagogical foundations for the development of the future teacher as a holistic person, which are indicated as consisting of:

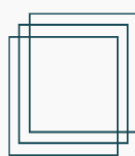

- motivation(motivation);
- determination of the criteria for the formation of a holistic personality;
- having a pedagogical system;
- content, stages, aspects of personality formation, requirements for it;
- pedagogical process;
- personality-professional orientation of students;
- requirements for students;
- communicative means and requirements for them.

Relying on the opinions of researchers, it should be noted that in the formation of students as a harmonious person, it is important to comply with the following requirements:

- develop the interests and abilities of young people to master knowledge;
- pedagogically correct Organization of student activities in the educational process;
- individual age transfer to each of the **student-youth**;
- formation of pedagogical femininity;
- vocational training;
- to achieve that they have the ability to get out of uncomfortable situations by finding the right way;
- social activism, formation of a civic role, etc.

The following criteria serve as the basis for the formation of a harmonious personality in the implementation of the above requirements.

- mental, spiritual-moral, emotional-aesthetic, physical development of the individual;
- to guide the manifestation of their creative capabilities;
- formation of humanitarian relations;
- creating conditions for the manifestation of individual personality, taking into account age characteristics;

- achieving the composition of the civic point of view;
  - preparation for life, work, social creativity;
- self-control, awareness of democratic principles, a sense of responsibility and duty to the motherland and the people.

In the moral education of a competent person, the formation of skills and competencies in moral concepts, rules, feelings, beliefs and behavior, first of all, in accordance with the demand of society, is considered an important task. A spiritual person is educated, a professional, a loyal citizen of the motherland. He is a person who knows and adheres to the laws of his state, who can be proud of his land, who, while preserving the wealth of his homeland, enriches it even more, enjoying its beauty. He fights against any harmful vices, avidly preserving the wealth of the people.

In the formation of healthy lifestyle skills in a person, his physically correct development, strengthening his own health; achieving a high level of mental and physical activity; acquiring hygienic qualifications and skills; organizing a lifestyle in accordance with existing moral requirements; physically being healthy and giving joy to oneself and others, avoiding harmful habits, are important. In the organization of labor education among students, it is important to rely on national and Universal traditions, to use the most effective methods and methods of teacher-disciple, family labor and crafts, to master the basics of modern professions, to achieve the realization by them that Labor is one of the main factors in the development of the individual. Also, environmental, economic, legal education is of particular importance in the formation of a harmonious personality.
